Subject Index

1D antiferromagnet 196
1D magnet 200
2D conductivity 26
2D electron system 255
2D systems 423
II–VI semiconductors 284
3D Josephson junction array 259
3D superconducting network 259
5f legand hybridization 247
72 tesla 560

a-$(BEDT–TTF)_2KHg(SCN)_4$ 466
a-nitronyl nitroxide radicals 497
AC susceptibility 171
Acoustic de Haas 111
Action integral 5
ADMRO (angular dependent magnetoresistance oscillation) 474
AFMR 239
Aharonov–Bohm effect 349
AlAs 295
AlGaAs/AlAs 295, 397
Anderson localization 331
Angle-dependent magnetoresistance oscillation 466
Anisotropy 227, 247
Anomalous sweep rate dependence 84
Antiferromagnet 135
Antiferromagnetic intermolecular interactions 497
Antiferromagnetic order 174
Antiferromagnetically coupled clusters 13

$(BEDT–TTF)_2KHg(SCN)_4$ 474
$(BEDT–TTF)_2KHg(XCN)_4$ 459
$(BEDT–TTF)_2MHg(SCN)_4$ 449
$(BEDT–TTF)_2TlHg(SCN)_4$ 479
$(BEDT–TTF)_2TlHg(XCN)_4$ 463
BEDT–TTF superconductors 470
Band crossover 295
Bechgaard salts 442
Bellows-type explosive-driven flux compression device 584
$Bi_2Sr_2CaCu_2O_x$ 262
$Bi_2Sr_2Ca_2Cu_3O_x$ 266
Biological systems 601
Biquadratic interaction 196
Black phosphorus 387

C_{60} 431
$(C_6H_{13}NH_3)_2(CH_3NH_3)Pb_2I_7$ 423
$(CH_3NH_3)PbI_3$ 427
$CaO–P_2O_5$ glass 119
Capacitor bank 560
Carbon nanotube 349
$Cd_{1-x}Co_xSe$ 411
$Cd_{1-x}Mn_xSe$ 411
CdS 284
CdTe/CdMnTe 415
CDW 384
$CeAl_3$ 235
$Ce_xGd_{1-x}Co_2$ 155
$CeInCu_2$ 235
CeP 1, 91
$CeRu_2Si_2$ 231
Chaos 367
Chemical effect 49
Commensurability 474
Condensed matter physics 565
Conductor, high section 546
Copper deposition 611
Copper oxides 449, 115
Critical magnetic field 33
Crystal fields 107
$CsCo_{1-x}Mg_xCl_3$ 204
$CsCoCl_3$ 204
$CsCuCl_3$ 200, 208, 213
$CsMnBr_3$ 75
$CsMnCl_3·H_2O$ 196
$CsMnI_3$ 75
$CsNiBr_3$ 75
Cu–Ag microcomposite wire 556
$CuFeO_2$ 71
$CuGeO_3$ 167, 171, 174, 178
Cuprate compound 174
Cuprous oxide 435
Cyclotron resonance 40, 271, 280, 284, 579

DCNQI 493
de Haas–van Alphen effect 102, 111, 231

Deformation 546
Demagnetization effect 80
Destruction of heavy fermions 227
Diamagnetism 427
Diluted antiferromagnets 88
Diluted magnetic semiconductors 13, 415
Dilution refrigerator 597
DLA 606
Donor levels 288
Double layer system 321, 327
DyAg 163
Dynamics 80
DyNiSn 107

Edge current states 361, 364
Edge state 331, 345
Effective mass 387, 483
Effects of Zn doping 167
Electrochemical reaction 611
Electrodeposition 606
Electromagnetic flux compression 40, 579
Electron transfer 611
Electron-Hall drops 292
Electron-Hall plasma 292
Electron–LO phonon interaction 339
Electron–phonon coupling 387
Electron–phonon interaction 284
Electronic phase transition 459, 463
Electronic specific heat coefficient 147
Energy versus magnetic field diagram 192
EPR 123
$Er_2Fe_3Si_5$ 99
$Er_{1-x}Lu_xCo_2$ 139
ESR 1, 174, 182, 239
EuTe 438
Exchange interaction 217, 411
Excitonic transition 415
Excitons 423, 427, 435
Explosion facilities 584
Explosive flux compression 33

Far infrared 174
Far-infrared absorption 266
Faraday method 589
Faraday rotation 438
Fermi level tuning effect 127
Fermi surface 102, 111, 231, 459
Ferric wheel 13
Ferrimagnets 131
Ferromagnets 135, 143
$Fe_xMn_{1-x}TiO_3$ 84
FeTiO 80
Field-induced electronic transition 384
Field-induced magnetic phase transition 71
Field-induced metamagnetic transition 159
Field-induced SDW 442
Finite chain 204
Finite-size effect 186
Flux flow resistivity 266
Fractals 606
Fractional quantum Hall effect 20, 255, 301, 321, 327
Frustrated 2D system 123
Fullerene tube 349
Fullerides 13

GaAs 288
GaAs quantum wells 579
GaAs/AlAs 407
GaAs/AlGaAs 301, 315, 357, 373, 403, 419
Gap equation 384
Ge far-infrared absorption 292
Giant magnetoresistance 251
Graphite 349, 384

H_{cr2} divergence 26
Haldane effect 200
Haldane gap 182, 186
Haldane system 192
Half filling 321
He gas flow cryostat 542
Heat capacity 353, 493
Heavy electrons 493
Heavy fermions 1, 231, 235, 239
Heavy fermion mass 26
HgSe 280
High conductivity 556
High magnetic fields 163
High magnetic field facilities 500, 504, 507, 512, 517, 521, 526, 530, 535, 538, 542, 546, 551, 565, 579
High magnetic field generation 572
High pressure 235, 411, 584
High strength 556
High-T_c superconductors 5, 26, 33, 262, 266, 526
Highly sensitive magnetometer 589
$Ho_xY_{3-x}Fe_5O_{12}$ 63
Hybrid magnets 49, 500, 504, 507, 512, 517, 526
Hybrid systems 546
Hydride 135
Hysteresis 611

Ice coils 575
Impurities 192
$In_2Cu_2O_5$ 95, 115
InAs/GaSb 271

InAs/GaSb/InAs 380
InAs/(InGaSb) 271
Incompressible quantum liquid 315
Infrared 512
Infrared absorption 288
Inhomogeneity 470
InP 288
Integrated intensity 178
Interference 361, 364, 593
Intermediate valence 155
Intermetallic compounds 127
Internal reinforcement 556
Iodine 427
Ising antiferromagnetic chain 204
Itinerant electron metamagnetism 127, 131, 139, 143, 147, 151

Jahn–Teller effect 63

Kagome lattice 123
Kondo insulator 20

Landau level 91, 255, 331, 345, 407, 419, 435
Large bore superconducting magnets 584
Lattice constant 147
Laves phase 127, 147
Laves phase compounds 131
Laves phase intermetallic compound YCo_2 151
Layered organic conductor 459
Layered perovskite-type material 423
Lead 427
Lead iodide 423
Line width 123, 178
Liquid-helium-free magnets 512
LO phonon 284
Long pulse 535
Low carrier 91
Low temperatures 411, 565
Low-dimensional systems 490
Low-energy phonons 119
$Lu(Co_{1-x}M_x)_2$ 147
$Lu_2Cu_5O_5$ 95, 115

Magic angle 442
Magnet technology 575
Magnets, high-T_c superconductors 546
Magnetic anisotropy 217, 601
Magnetic breakdown 449, 479, 483, 487
Magnetic field 353
Magnetic materials 49
Magnetic orientation 601
Magnetic oscillation 490
Magnetic phase diagram 75, 167, 171, 251
Magnetic phase transition 63, 208
Magnetic polaron 438
Magnetic resonance 63
Magnetism 107, 438
Magnetization 1, 40, 57, 75, 91, 95, 99, 119, 139, 143, 155, 159, 167, 186, 227, 243, 247, 497
Magnetization process 196, 204
Magnetization steps 13
Magneto-optical absorption 431
Magneto-optical measurement 407
Magneto-optics 40
Magneto-oscillatory spectra 435
Magnetoabsorption 423, 427
Magnetoabsorption spectra 415
Magnetoconductivity 339
Magnetoexcitons 407
Magnetometers 1
Magnetophonon resonance 339, 387, 419
Magnetopolarons 20
Magnetoresistance 33, 235, 262, 449, 459, 463, 493
Magnetospectroscopy 572
Magnetostriction 80, 139, 235, 593
Magnetotransport 57, 271, 301, 357, 374, 474
Megagauss fields 33, 40, 280, 288, 579
Mesoscopic systems 345
Metal–insulator transition 20
Metamagnetic transition 80, 84, 95, 99, 102, 115, 135, 231, 251
Metamagnetism 143, 163
MHD effect 606
Microwave spectroscopy 63
Millikelvin regime 597
$Mn_xMg_{1-x}TiO_3$ 88
MOCVD 271
Modulation doping 295, 419
Molecular field theory 208
Multi-layer coil 1
Multi-section 546
Multi-step magnetization 91
Multi-phonon spin NPR 26

Narrow gap 280
$(Nb,Ti,Ta)_3Sn$ superconductive wire 521
$NdIn_3$ 102
Negative differential conductivity 380
NENP 182, 200
Nesting 479, 487
Neutron diffraction 163, 213
NiC_2O_4 2DMIz 186
NMR 139
NMR in high magnetic fields 200
Non-destructive 100 T coils 26

Non-equilibrium effects 13
Nucleation and growth 80

Open Fermi surface 474
Open orbits 449
Optical absorption 349
Optical fiber 593
Optical spectroscopy 301
Optical studies 391
Optical transition 438
Optimized reinforcement 5
Organic conductor 466, 474, 479, 487, 490
Organic radicals 497
Organic superconductors 442, 483

p-type heterojunctions 397
PbSe 280
Perovskite 427
Phase diagram 243
Phase transition 243, 579
Photoluminescence 301, 315, 397, 403, 411, 419
Photovoltaic effect 364
Platform fields 546
Polyhelix coils 512
Pressure 483
Pressure effect on metamagnetic transition 151
Pulsed fields 13, 95, 159, 262, 387, 589, 593
Pulsed magnets 5, 20, 530, 535, 538, 542, 546, 551, 556, 560, 565, 575, 597

Quantum fluctuation 208
Quantum Hall effect 301, 315, 331, 361, 374, 397, 442
Quantum interference 357
Quantum spin effect 200
Quantum wells 353, 391, 407, 415, 419
Quantum wires 331, 339, 345, 353, 357
Quasi-continuous magnets 538
Quasi-continuous pulsed fields 530
Quasi-two-dimensional organic conductors 463

R–T intermetallics 217
Random fields 88
Rare earth intermetallics 135
$RbMnBr_3$ 75
Red blood cell 601
Reentrant spin-glass 84
Repeated pulsed fields 213
Resistive transition 470
Resistivity 107
Resonant tunneling 20, 367, 374, 380

Saturated superfluid helium cooling systems 521
$Sc_2Cu_2O_5$ 95, 115
SdH oscillations 479, 487
SDW 384, 466, 479, 487
Semiconductor heterostructures 255
Semiconductors 280
Semicontinuous pulsed fields 217
Semimagnetic materials 57
Semimetallic superlattices 271
Semimetallic-to-semiconductor transition 271
Shubnikov–de Haas effect 5, 466
Single point detection 155
Single-turn coil technique 40
SP materials 171
Spin wave 327
Spin-flip transition 131
Spin-flop transition 88
Spin-lattice relaxation 119
Spin-Peierls systems 174
Spin-Peierls transition 167, 171, 178
$SrCr_8Ga_4O_{19}$ 123
Steady field facilities 584
Steady high magnetic fields 49, 517
Steel-clad 546
Step magnetization 227
Strain 295
Submillimeter wave ESR 115, 119, 178, 208
Superconducting coils 526
Superconducting magnets 517, 521, 597
Superconductivity 255
Superconductor gyrotron 512
Superconductors 13, 49
Superlattices 391, 490
Susceptibility 107
Symmetric antisymmetric gap 327

TMTSF 490
TMTSF salts 442
$(TMTSF)_2X$ 487
TbNiSn 107
Theory 182, 192, 255, 259, 288, 321, 327, 345, 349, 353, 384, 487
Thin films 431
Tilted magnetic fields 367
Time-resolved optics 315
Time-resolved spectra 403
TmSb 111
Transition temperature 259, 384
Triangular antiferromagnets 75
Triangular lattice antiferromagnets 71
Triangular lattices 208
Triple barriers 374
Tunneling 391

U_2T_2X 247
UNiGe 251
UNi_2Si_2 243
UPd_2Al_3 1, 227
URu_2Si_2 1, 239
Ultrahigh magnetic fields 135
Upper critical fields 266
User coils 542

Valence fluctuating compounds 159
Valence transition 159
Van der Waals epitaxy 431

Water-cooled coils 526
Water-cooled magnets 500, 517
Weak links 470
Wide parabolic quantum wells 403
Wigner solids 301
Winding machines 556

X band 295

$(Y,Gd)(Co,Al)_2$ 131
YBCO 33
$YBa_2Cu_2O_x$ 266
YCo_2 127
YCo_3 135
$Y_2Cu_2O_5$ 95, 115
$Y_{1-x}Nd_xCo_3$ 143
$YbIn_{1-x}Ag_xCu_4$ 159

Zeeman splitting 415
$ZnMn_2As_2$ 57
ZnS 284
ZnSe 284
